PROFESSIONAL PROFILE

Full Stack Developer with 3 years of experience building web applications. Specialized in React.js. Experienced in backend development with ASP.NET Core and Node.js, migration of legacy systems, integration of external APIs, implementation of security best practices, and use of AI-assisted development tools to accelerate software delivery and problem solving.

EDUCATION

Full Stack Developer
CoderHouse

August 2022 – November 2023

Industrial Engineering
Universidad Nacional de Rosario

March 2016 – July 2022

PROFESSIONAL EXPERIENCE

Expreso Brio, Rosario – *Software Developer*

May 2025 – Present

- Led the migration of a legacy system from Visual Basic to a modern architecture based on React.js, ASP.NET Core, SQL Server, and Node.js.
- Integrated AFIP APIs (WSAA + WSFEXv1) for authentication and electronic invoice issuance.
- Accelerated development using AI-assisted tools (Codex/ChatGPT) for code generation, debugging, and documentation.

Yamana Tech, Ushuaia – *Backend Developer*

January 2025 – April 2025

- Participated in the backend team responsible for migrating the human resources management system used by the Armed Forces from Visual Basic to .NET and SQL Server, optimizing critical queries.

Nash v2, Lomas De Zamora – *Desarrollador Frontend Freelance*

November 2024 – April 2025

- Responsible for frontend development, focusing on performance optimization and API integration hosted on AWS.

TechX, México – *Desarrollador Frontend*

May 2023 – October 2024

- Developed responsive web applications using React.js and integrated external APIs with Material UI.
- Worked closely with the backend team to integrate Node.js APIs and manage PostgreSQL databases across 7 projects. Collaborated with the UX/UI team to ensure 100% implementation of Figma designs.

SKILLS

Node.js | ASP.NET Core | SQL Server | PostgreSQL | Docker | React.js | Next.js | Redux | Git | TypeScript

LANGUAGES

- English: Advanced (B2)
- Italian: Advanced (B2)
- German: In progress

PROJECTS

- Developed a full stack e-commerce platform using Next.js, Docker, TypeScript, ASP.NET Core, and PostgreSQL, including AI-powered product content generation features.
